

Report Cards on Child & Youth Sex Trafficking

State Action. National Change.

KANSAS

The Report Cards on Child & Youth Sex Trafficking Advanced Legislative Framework builds on the original Protected Innocence Challenge Framework, preserving the most fundamental components while including new policy priorities that reflect feedback and research from the field—particularly in the area of victim protections. The advanced framework will be used to grade the states next fall when we release the inaugural Report Cards on Child & Youth Sex Trafficking. As such, the 2021 legislative session is a critical time for your state to strengthen its laws before report cards and corresponding grades are issued.

So what is **KANSAS**'s current score and what changes are needed? As of August 1, 2019, **KANSAS HAD RAISED ITS GRADE FROM F TO A:**

KANSAS

Year	SCORE	GRADE	10	22	14.5	9.5	22.5	15
2019	93.5	A	10/10	22/25	14.5/15	9.5/10	22.5/27.5	15/15
2011	50.5	F	5/10	8/25	11/15	5.5/10	13.5/27.5	7.5/15

Kansas's trafficking law includes any child who is bought for sex regardless of whether force, fraud, or coercion is used, regardless of whether a buyer exploited

the youth without a trafficker's involvement, and regardless of whether the victim identifies a trafficker. Further, state law provides for a specialized service response. However, state law does not prohibit the criminalization of minors for prostitution offenses.

To support implementation of the Report Cards on Child & Youth Sex Trafficking Advanced Legislative Framework, our Policy Team will remain available to provide rapid, technical assistance to support legislators, advocates, and state agencies; technical assistance requests can be submitted [here](#).
